

## Template Study Proposal Form

*Fond: Calibri, size 11, line spacing 1.5*

Title page, including:

- Title of the project
- Name and function researcher(s)
- Involved Steering Committee member
- Contact details corresponding researcher
- Funding of the project (if applicable, otherwise state 'none')
- Conflict of interests (if applicable, otherwise state 'none')

A. A summary of the project (maximum 200 words)

B. A project description of up to 1000 words (excluding references), and a maximum of 2 illustrations (tables/graphs/images). The following structure should be used:

- Background
- Project objectives
- Research methodology including data sources and model training
- Expected outcomes
- Implications and relevance
- References

C. Timeline with start date and the expected year of abstract submission for the EORTC-CLTG annual meeting.

D. Specification of Data needed

- Inclusion and exclusion criteria
- List of metadata needed

*The application should clearly specify which metadata (e.g., clinical data) information is required for model validation. If this necessary data is not yet available in the Registry, the participating centers must be informed about how and when this needs to be added to the Registry.*

E. A clear justification for the use of data from the CLIDIPA Registry (maximum 250 words)

*Why is data from the CLIDIPA Registry necessary for performing the study?*
